

- 2-wire system
- 24VDC power system
- Strong resistance to surge
- 7.4mm Ultra-thin design
- Support terminal grounding (optional)
- 35 mm rail mounted

This SPD limits induced transients of different origin (lightning stroke, switching impulse, etc.). This is achieved by diverting the transient current to ground and limiting the signal line voltage to a safe level for the duration of the surge.

It can be applied to 24V DC power system.
